

# FLINT HILLS TECHNICAL COLLEGE

## Welcome to Flint Hills Technical College!

Thank you for visiting our website. I hope you'll take some time to explore FHTC's site and learn more about all the wonderful ways our College can serve you.

Flint Hills Technical College is committed to providing an affordable education that prepares our students for high-demand, high-skill, and high-wage job opportunities in 19 different fields of study. From cutting-edge trends in Industrial Engineering to state-of-the-art training with Welding Technology, students will find FHTC is the right place to begin a new career path.

Student success is the number one priority of our faculty and staff. We are eager to help you achieve your goals, and provide several training options including short-term certificate courses, daytime, evening, weekend and online class schedules, giving students the ability to determine what works best for them. The FHTC Foundation also provides thousands of dollars in scholarship funding each year, which is just one more way we can help our students succeed.

We welcome high school students to jump start their college career through Concurrent Enrollment Programs, on-site training, and online courses. With the help of Senate Bill 155, high school students are able to gain college credit and avoid a large financial burden. We've also recently created a new high school scholarship, thanks to the generosity of the Flint Hills Youth Charitable Foundation. Students residing in Chase, Coffey, Greenwood and Lyon counties are eligible to apply for this funding.

Our Adult Education and Workforce Training Center gives community members the opportunity to obtain their GED, with new students accepted every six weeks.

In addition to responding to the need of technical education and training, we also pride ourselves on the strong Business and Industry partnerships we have developed through our Customized Training program. Flint Hills Technical College continues to be a leader in personal and professional development, and we encourage local and regional employers to contact us regarding your training and continuing education needs. FHTC also offers a variety of non-credit community education classes through our Community Connections program, with new courses released each quarter.

FHTC has been recognized as a leader in education through the Aspen Institute, Military Friendly Schools Designation, and Bankrate.com, and we continue to look at new and innovative ways to meet industry and workforce needs, as the demand for technical education and training continues to grow.

Please don't hesitate to contact us at 620.343.4600 or 800.711.6947 to learn more about your options at Flint Hills Technical College. We look forward to serving you.

Best wishes,
